

K-LOVE radio and its broadcasting is of great value to me as a resident in California. Not only as I live and work here has it been a constant source of positive influence but also as I travel around the states. The effect of losing it, on myself and my community, would be devastating as it is one of the only ones providing a 'family friendly' program and therefore a safe-haven for millions in a sea of vulgar, worldly influenced, violent and disgusting programs preying on rumor, vice and shock (as the FCC has recently been trying to curtail...to little success). I believe losing this programming by the rule changes of LPFM over FM translator service will be a detriment to all peoples looking for a positive influence in their lives and therefore driving them to the alternatives as I discussed before. Please do NOT change these rules and force FM translator stations off the air!
